

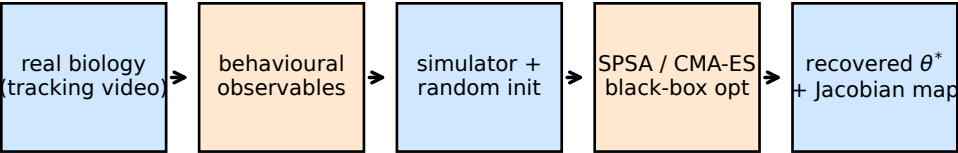

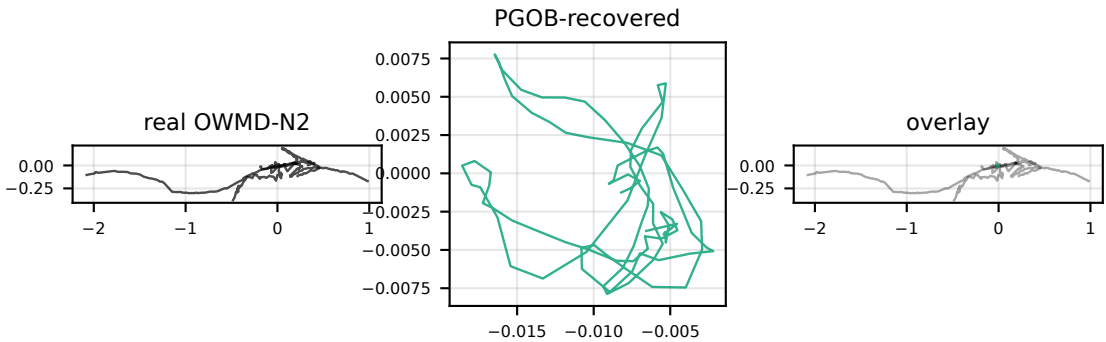

Fig 1 | PGOB: behaviour-only whole-organism parameter generation with per-axis residual attribution

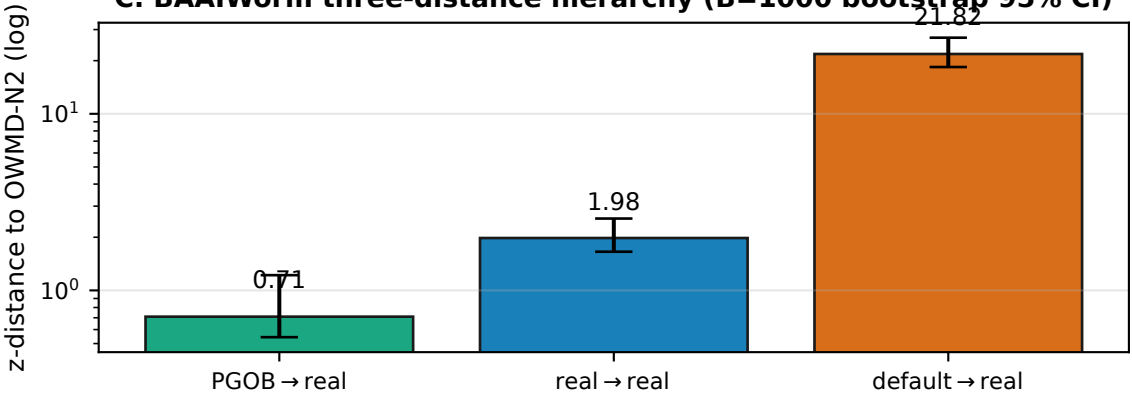

A. Behaviour-only, non-invasive parameter generation

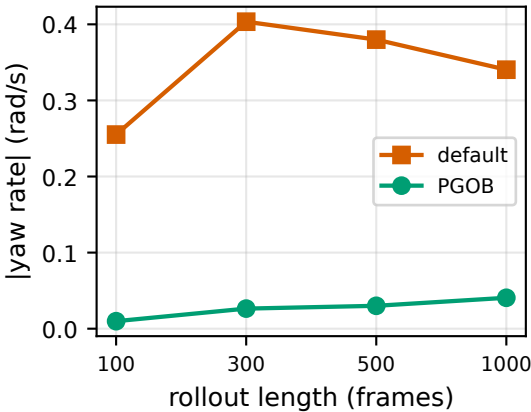

B. Worm hero case study (recovered vs real OWMD-N2)

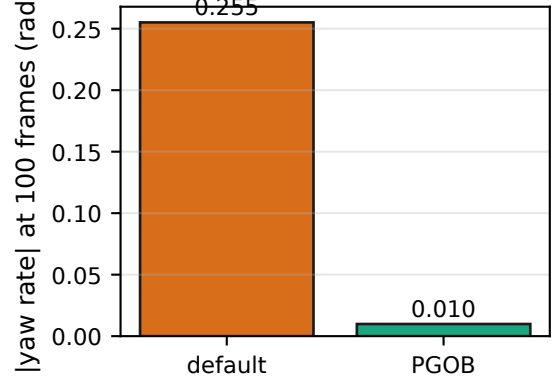

C. BAIWorm three-distance hierarchy (B=1000 bootstrap 95% CI)

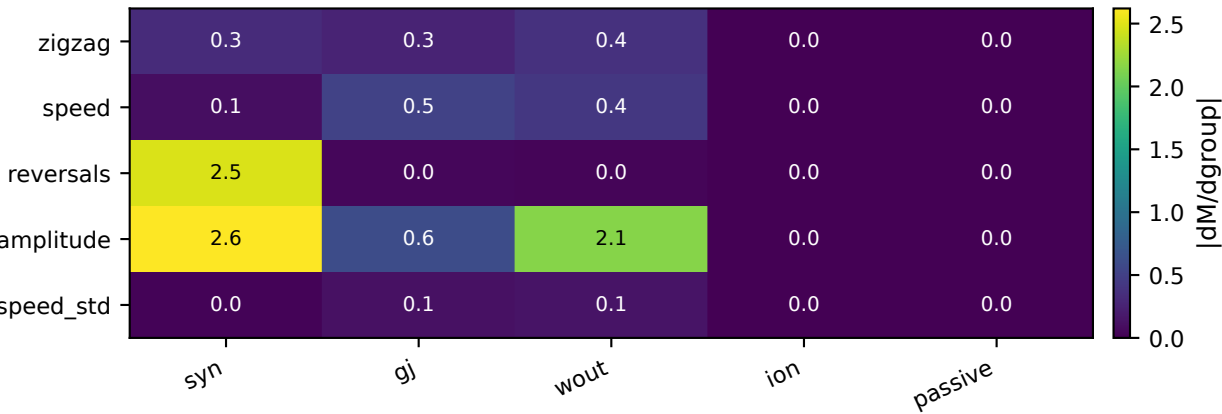

D1. yaw-rate vs rollout

D2. FlyGym v2 yaw recovery

E. Residual-to-mechanism Jacobian (worst: reversals=0.261 → syn)

F. Canonical headline metrics (real data)
